

Inside of Me

India Grayson is a happy 8-year-old girl, adored by her father, cherished by her mother. She's devastated when her beloved father, Victor, suddenly disappears, leaving nothing but a neatly folded pile of clothes on a windy beach in Scotland. She bargains with God: no more chocolate ... roast potatoes ... packed lunch ... if you send my daddy back. Now 15 and in the grip of anorexia, she's convinced she heard his voice on a crowded London station and is determined to find him. Isolated and overwhelmed, her mother, Tonya, succumbs to gnawing doubts about the man she thought she knew. Where was he on the night two teenage girls went missing? What was he really doing when he was away for two days and nights without explanation? Who exactly was he? What dark secrets were haunting him? A third teenager goes missing in London in the same week India thinks she heard his voice. Can he be involved? Should Tonya share her secret suspicions with the police? Will India ever forgive her if she does? And how far will India go to be reunited with him? The revelation when it comes is much more challenging than Tonya ever dreamed of. Body image issues and identity crises trouble us all at times; this gripping story reaches to the core of what makes us ourselves and how we live with our doubts and conflicts.
