

Microsoft Office for Teachers/ Intergrating Educational Technology into Teaching (3rd Edition/2004)

For courses in Computers in Education, Instructional Technology, or Instructional Media. *Integration methods should be based in both learning theory and teaching practice. Integration should match specific teaching and learning needs. *Old integration strategies are not necessarily bad; new strategies are not necessarily good. *Using these three premises as a foundation, this text presents effective theory- and research-based strategies for integrating technology resources and technology-based methods into everyday classroom practices. It is written from the teachers perspective, making it ideal for both novice and experienced computer users.
