

# Tracking Students Records Electronically

This project aims to produce a web-based system for staff and students. Staff are able to track their students attendance. The system provides attendance reports about a specific lecture or module. If the staff is a mentor or a supervisor, he can view his students attendance reports. Students are able to view their attendance status. The system provides summarized or detailed reports about students attendance. This book describes the requirements, design, implementation and security of Tracking Students Attendance system. The system sends warning emails to students who exceed a specific number of absences. It system provides a web-based interface for tracking attendance of each students. Usernames and passwords are required to login the system. The whole system has been tested. A significant proportion of the proposed requirements were met with a web application based on PHP scripting language and MySQL database. It was concluded that the project as a whole was a success
