

UFO Caught: Identified (Flying Experiences Book 1)

Labor-Day-Week-End in 1954. Around Pittsburgh, steel mills were closed for the Holiday. It was unusually clear. Throughout the 1940s and 1950s Flying Saucers were very popular in the news. Green Spacemen: 18 inches tall, had been news since 1900 and before. Roswell, NM has been News since 1948. Our Air Defense planes were F-86D, an All-Weather version of the F-86 Saber Jets. The F-86D was then, holder of the World Speed Record. We could see a large, reddish object, that looked like a baby moon. I asked the Observatory by phone, Is the object I see Mars? It looks large. They told me, Yes. On September 7th, the Planet Mars will be closer to Earth than for 50 years. I volunteered to be First-Off, if we were scrambled. I answered the telephone that was direct to Radar Control. They were getting a lot o calls from Ground Observers in the area who were questioning the unusual appearance of Mars. at least one Ground Observers was not. He was positive that he was observing a real UFO. The Radar Controller warned us to expect an Official Hot Scramble. I was on my takeoff roll and was relieved that Mars showed no movement relative to other stars. I knew positively that the object was a long distance away. Radar Control, Radar did not show any objects of any kind in the area. The Ground Observer was reporting a bright white light, stationary at 20,000 feet. Radar Control directed me to identify the UFO reported by the Ground Observer. I climbed rapidly to 20,000, searching visually and with radar. I reported No Joy to my Radar Controller. It was a nice to have a clear sky. But no planes or UFOs. I set out to determine where the Ground Observer was looking. He was to report with the word, Now by phone when I was directly lined up between him and the UFO. When he was located east-west, I switched to making north-south passes. On my first north-south

pass, just as I was over the Ground Observer, I thought, In another five seconds I will be in line with where he is seeing Mars. He will say, Now and we will have identified this UFO as Mars Instead, Just as I was over the Ground Observer, Radar Control said, Now. I looked straight up overhead. There was a bright light possibly at 20,000 feet. I reported Tallyho, and I applied full power, lighting the Afterburner. I started to climb to intercept and identify the UFO, whatever it was. Radar Control said, Roger, You are cleared all-the way. We have you, but we still do not have anything else on our radar. But, I did. I now had a visual contact on a single bright white light and a small weak radar target on my F-86D Fire Control Radar. As I started after the UFO, it moved off to the south-east at a greater speed than mine. I was flying the worlds fastest plane and the UFO I was chasing was leaving me behind. Another pilot had been Scrambled after a UFO and had chased it in an F-86D at full speed until he had run out of fuel without ever getting close enough to identify it. I did not want to report the same result. I changed course and climbed toward Mars. As I climbed through 20,000 feet, I looked back to check. The light was level with me, as reported, it was at 20,000 feet. When I was well ahead and above the UFO, I turned back toward them. They could not get away now. I locked on the radar of my Fire Control System. I thought, I have got you now, you little green men. Or maybe, I should wonder who is going to get who?
